Why Use A PUSH PULL LEG ?

- Balanced training – covers all major muscle groups without overlap.
- Efficient recovery – muscles rest while others are worked.
- Flexible – works for 3, 4, 5, or 6 training days per week.
- Strength & size – combines compounds and isolation for both power and hypertrophy.
- Proven effective – simple, structured, and supported by research for consistent progress.

Who Should Use A PUSH PULL LEG ?

- Intermediate or advanced lifters who enjoy bodybuilding-style training.
- People focused on muscle size (hypertrophy) more than strength or performance.
- Lifters who have enough weekly time for 5–6 sessions.

Notes :

Q\ How long should you train with this plan ?

A\ You should train within a period of 45 Days.

Q\ What is back off ?

A\ After doing your heavy working sets (close to your max, low reps), you reduce the weight (about 20–40% lighter) and perform one more set with higher reps (10–15).

Q\ What is FST-7 ?

A\ Pick one isolation

- 7 sets × 8–12 reps
- Short rest between sets (20–30 seconds)

Training Cycle will be as following:
